Type Washing Machine

# HELİWASH

Helical Drum Tunnel Type Washing Machine

For Videos

Industrial parts washing for mass production. Ideal solution for chip and oil removal of small parts and stamped parts.

## Work pieces

## Advantages

Industrial part washing for mass production ideal solution for chip and oil removal.

## Operation Principles

Work pieces are washed rinsed and dried with detergent and pressurized hot water spray respectively in helical conveyor tunnel.

## Application Areas

- Machined parts as rivets, nuts, bolts, screw etc.
- Textile accessories as zip, button, snap, fastener etc.
- Fittings and equipment for gas regulators, hot water pipes lines, natural gas lines etc.
- Before and after heat treatment process
- Sanitary industry; fittings and armature
- Stamped parts

## Operation Processes

- Spray wash
- Spray rinsing
- Drying

## Technical Specifications

Type	220/40/3	350/40/3	400/50/3	500/70/3
Helix Diameter (mm)	400	400	500	700
Wash Capacity (kg/s)	250	350	450	600
Length (mm)	2200	3500	3750	5000
Washing Tank Capacity (L)	300	350	400	500
Rinsing Tank Capacity (L)	200	250	300	400
Drying			Available	
Oil Separator			Available	
Mesh Filter			Available	
Vapour Suction			Available	
Machine Body			Stainless Aisi 304	
Automatic Loading			Optional
