USEFUL INFORMATION

If you use 30 – 40 °C hot water and INTERSONİK detergent (optional) for dishwashing, you can easily see the fat away...

- If you clean the heavy grease on the dishes with paper towel before washing, washing speed will increase
- Rinsing with hot water is recommended before you place the dishes into the MiniSONDA container.
- Vegetables washed with MiniSONDA retain their freshness for a long time because the organisms over them are all eliminated.
- You can place the products such as plates, baby bottles that you want to wash to the MiniSONDA container as you desire.
Washing effect is same in every way.
- Washing process with MiniSONDA is recommended to be applied after eliminating the coarse sludge on fruits and vegetables.

WARRANTY

Device is under guarantee for a period of 24 months after purchasing, against material, fabrication and workmanship defects.
