WASHING CHEMICALS

Industrial Washing Chemicals Suitable For Work Pieces and Processes

WASHING CHEMICALS FOR DIFFERENT SECTORS

Maintenance purpose cleaning (Rubber mould, PVC calibrator, burned oil, carbon, filter cooler etc.)	BRDN-14	BRSX		
Armature, gas cock, mould arm (After metal machining, steel, aluminum, brass etc.)	BRGC-07	BRLA-04	BRLA-03	BRGC-10
Rust, paint, calcitic, scale cleaning	BRAX	BRDN-14		
Polishing paste cleaning	BRGC-07	BRGC-10	BRCT-04	
Electronic component (PCB card etc.)	BRLA-04	BRLA-03		
Textile machine components (Lamel, Nire, Weaving reed, rotor, nozzle etc.)	BRGC-07	BRGC-10	BRLA-04	BRDN-14
Metal machining steel, casted material cleaning	BRSX	BRLA-04	BRGC-07	
Galvanized sheet, aluminum, zamak cleaning	BRLA-03	BRGC-10	BRLA-04	BRGC-07
Laboratory equipment cleaning	BRLA-03	BRLA-04		
KLT, Plastic basket, palet, separator cleaning	BRIC	BRLA-03	BRLA-04	
Printery equipment, anilox etc. cleaning	BRLA-04	BRGC-07	BRGC-10	
Passivation, corrosion protection	BRPX	BRLA-04		

- Powder; 25 kgs package
- Liquid; 25 liter plastic container
- Please ask for detailed MSDS and TDS for each particular chemical type.

WASHING CHEMICALS

Industrial Washing Chemicals Suitable For Work Pieces and Processes

CHEMICAL TYPES

1 BRGC – 07 (Powder) Immersion alkaline degreasing chemical:

Suitable for cleaning of iron, steel, casted metal, stainless steel in 50-70° C immersion bathes. After cleaning parts should be rinsed.

2 BRGC – 10 (Powder) Immersion alkaline degreasing chemical:

Suitable for cleaning of aluminum, zamak, brass 50-60° C immersion bathes. After cleaning parts should be rinsed.

3 BRSX (Powder) Immersion / Spray Washing Chemical:

Suitable for cleaning of casted material, zamak, brass 50-60° C immersion bathes and/or spray washing. After cleaning parts should be rinsed. Very powerful chemical for removing intensive dirtes in mainetenance purpose cleaning.

4 BRDN – 14 (Powder) Immersion alkaline degreasing chemical:

Suitable for cleaning of aluminum injection moulds, rubber moulds, PVC calibrator, filter, cooler, nozzle etc. in 50-70° C immersion bathes. After cleaning parts should be rinsed.

5 BRLA – 03 (Liquid) Immersion / Spray Washing chemical:

Suitable for cleaning of aluminum, zamak, brass in 50-60° C immersion bathes and spray washing.

6 BRLA – 04 (Liquid) Immersion / Spray Washing chemical:

Suitable for cleaning of steel, iron, stainless steel and aluminum in 50-70° C immersion bathes and spray washing

7 BRAX (Liquid) Acidic Washing Chemical:

Suitable for cleaning of steel, iron material rust oxide layer in 40-60° C immersion bathes. After cleaning parts should be rinsed.

8 BRCT - 04 (Liquid) Alcaline washing chemical :

Suitable for stainless steel material and cleaning of polishing paste in 50-70° C immersion bathes and spray washing. After cleaning parts should be rinsed

9 BRIC (Liquid) Alcaline washing chemical :

Suitable for cleaning of KLT, plastic productss, plastic moulds etc. in 40-60° C spray washing. After cleaning parts should be rinsed

10 BRPX (Liquid) Passivation chemical:

Suitable for passivation of iron, steel products in 40-60° C immersion bathes and spray washing.
