ROTAWASH

Cabin Type Automatic Washing Machine

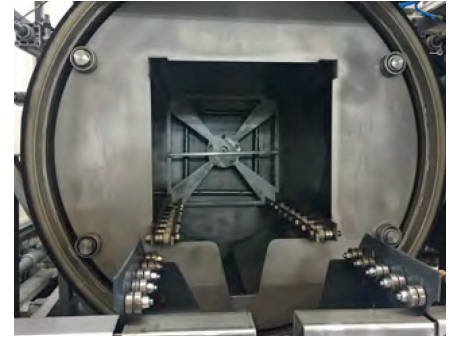

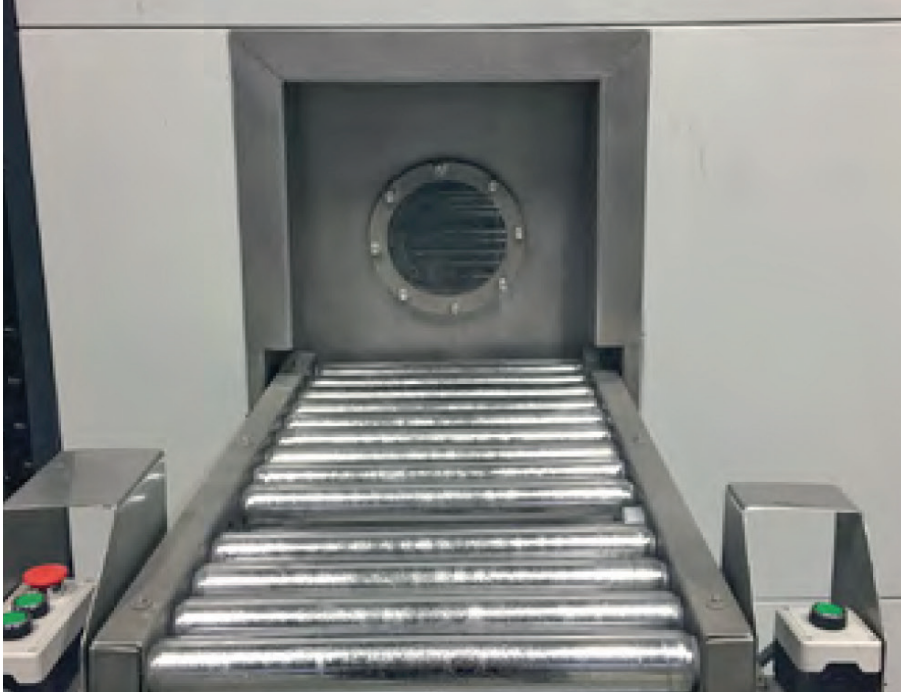

For Videos

Powerful wash-rinse-drying process in a cabin /
work piece rotation and tilting!

Work pieces

Operation Principles

- Effective washing of whole surfaces of the work piece with high volume spraying and rapid liquid flooding the cabin.
- With rotational motion, whole complicated surfaces, oil channels, blind holes, water jackets of work piece is provided completely clean and dry.
- Hermetic operation system prevents the diffusion of water vapor formed during whole operation.
- The machine has sound and durable body construction.
- Automatic water supply and chemical design system provide minimum system (maintenance) care and maximum operation performance.
- The machine has sound and durable body construction.
- The water contact surfaces are made of stainless steel.
- Body covers and control panels are made of epoxy painted steel sheets, which are provided and guaranteed long and continuous working life.

Technical Specifications

Type	RW 45.26	RW 55.33	RW 65.38
Basket size (WxLxH) (mm)	450 x 260 x 260	550 x 330 x 330	650 x 380 x 380
Number of washing step	1	1	1
Number of rinsing steps		Optional	
Drying		Optional	
Flooding		Available	
Number of basket per hour	5 - 6	5 - 6	5 - 6
Temperature (Control)		PLC controlled	
Timer (Minute)		PLC controlled	
Ultrasonic system		Optional	
Basket rotation		Optional	
Inlet valve		Available	
Chip filter		Optional	
Chemical dosing pump		Optional	
PLC Poke Yoke		Available
